Royal Raymond Rife

Imagine, for a moment, that you have spent more than two decades in painfully laborious research-- that you have discovered an incredibly simple, electronic approach to curing literally every disease on the planet caused by viruses and bacteria . Indeed, it is a discovery that would end the pain and suffering of countless millions and change life on Earth forever. Certainly, the medical world would rush to embrace you with an unimaginable accolade and financial reward unimaginable. You would think so, wouldn't you? You would think you were arguably the greatest medical genius in all recorded history and would suffer a fate literally the opposite of the foregoing logical scenario. In fact, the history of medicine is a history of backward thought and jealousy, but most pathetically, by greed and money.

In the nineteenth century, Semmelweiss struggled mightily to convince surgeons that it was a good idea to sterilize their instruments and use sterile surgical procedures. Pasteur was ridiculed for years for his theory that germs could cause disease. Scores of other medical visionaries went through hell for simply challenging the medical status quo of day, including such legends as Roentgen and his X-rays, Morton for promoting the 'absurd' idea of anesthesia, Harvey for his theory of the circulation of blood, and many others in recent decades including: W.F. Koch, Revici, Burzynski, Naessens, Priore, Livingston-Wheeler, and Hoxsey. Orthodox big-money medicine resents and seeks to neutralize and/or destroy those who challenge its beliefs. Often, the visionary who challenges it pays a heavy price for his 'heresy.' So, you have just discovered a new therapy which can eradicate any microbial disease but, so far, you and your amazing cure aren't very popular. What do you do next? Well, certainly the research foundations and teaching institutions would welcome news of your astounding discovery. Won't they be thrilled to learn you have a cure for the very same diseases they are

receiving hundreds of millions of dollars per year to investigate? Maybe not, if it means the end of the gravy train. These people have mortgages to pay and families to support. On second thought, forget the research foundations.

Perhaps you should take your discovery to the pharmaceutical industry; certainly it would be of great interest to those protectors of humanity, right? But remember, you have developed a universal cure which makes drugs obsolete, so the pharmaceutical industry just might be less than thrilled to hear about your work. In fact, the big shots might even make it certain that your human disease-ending technology never sees the light of day, by preventing it from becoming licensed by the regulatory agencies. Now, assuming your amazing cure is an electronic instrument, the only cost of using it is electricity. And it is absolutely harmless to patients, who can recover without losing their hair, the family home, and their life savings. So, with your technology, there is no longer any reason for people with cancer to pay over \$300,000 per patient -- to become deathly ill from chemotherapy, radiation treatments, and the mutilation of surgery. It sounds like you won't find many friends and support among practicing oncologists, radiologists, and surgeons, doesn't it?

You might try the hospitals and big clinics. But how thrilled are they going to be about a therapy administered in any doctor's office; which reverses illness before the patient has to be hospitalized? Thanks to you, the staffs of these institutions will essentially be out of work. Well then, how about the insurance companies? Surely, they would be delighted to save the expense of hospitalization - at least the companies which haven't invested in hospitals, where the staff is now sitting around waiting for someone to break a leg or be in a car accident...and the ones who don't lose policyholders as a result of your invention...and the companies which aren't trying to divest their pharmaceutical stock. Oh well, forget the insurance companies, too.

It looks like you just might have a little problem with the medical establishment, no?

Probably the only friends you'll have will be the patients and those progressive doctors who see change as an opportunity, rather than a threat to their established money-making monopoly. Those people will love you. But they don't call the shots. What follows, now, is the story of exactly such a sensational therapy and what happened to it. In one of the blackest episodes in recorded history, this remarkable electronic therapy was sabotaged and buried by a ruthless group of men. It has re-emerged in the underground medical/alternative health world only since the mid-80's. This is the story of Royal Raymond Rife and his fabulous discoveries and electronic instruments.

San Diegan's Super-Microscope Gives First View Of Filtered Bacteria
Instrument Praised As New Aid To Science

PARADISE, Dec. 4.—Using the new "super-microscope" invented by Dr. Royal Raymond Rife of San Diego, Dr. Arthur Isaac Kendall of Northwestern University Medical School has seen for the first time the exceedingly minute moving bodies that apparently carry the life of bacteria when these are lodged to "dissolve" into a form that will pass through the pores of the finest porcelain filter and still remain alive.

The work was done at the Pasadena hospital, and will be reported in the official publication of the California Medical Association, California and Western Medicine.

Bacillus Used
 The material used by Dr. Kendall was a culture of the typhoid bacillus, ordinarily a fairly large germ, easily visible under the higher-powered lenses of a compound microscope. By feeding it on his recently-evolved "K medium," which apparently has the power of causing all visible bacteria to pass over into an invisible, filterable phase, Dr. Kendall induced the bacilli to go through this change. Under the highest power of the ordinary microscope, he could see nothing moving in the fluid, except a swarm of rather active little granules that could be seen only as tiny motile points.

Examination with the Rife microscope, however, these points became plainly visible as small, oval, actively moving bodies, but quite loss in color. These appeared in all the cultures, and could be transferred from one culture to another through the finest

A new superpower microscope which magnifies objects to 5000 times their normal size has been perfected here by Dr. Royal Raymond Rife, shown above with his invention. Six quartz lenses are used in the powerful new instrument, which magnifies on a scale which would make an ant appear larger than an elephant. Another unusual thing about the microscope is that objects seen through it are shown in true perspective, rather than in reverse focus, as is the case with previous microscopes.

Microscope Praised
 This visual demonstration of the bacteria invisible, living and moving particles of the filterable phase of a bacillus, is hailed editorially by California and western medicine. Of the Rife microscope, the editorial says:
 "Whereas our present microscopes magnify from one to two thousand diameters, in this new microscope we have an instrument for which a magnification as high as 17,000 diameters is claimed. This is certainly a long stride from the initial efforts of Van Leeuwenhoek, whose simple instrument may be said to have laid the foundation for the science of bacteriology which later came into being, and by means of which occurs much of the world's progress in man's conquest of the infective and other diseases has been made possible."

If you have never heard of Rife before, prepare to be angered and incredulous at what this great man achieved for all of us only to have it practically driven from the face of the planet. But, reserve your final judgment and decision until after you have read this. Of course, some may regard this as just an amusing piece of fiction. However, for those who are willing to do some investigating on their own, there will be mentioned several highly-respected doctors and medical authorities who worked with Rife as well as some of the remarkable

technical aspects of his creation. However, in the final analysis, the only real way to determine if such a revolutionary therapy exists is to experience it yourself. The medical literature is full of rigged 'double-blind' clinical research tests, the results of which are often determined in advance by the vested corporate interests involved.

Filterable Germ Forms Seen With New Super-Microscope

Device Using Quartz Optical Parts Makes Possible First View of Organisms Rendered Filterable by K Medium

Using the new "super microscope" invented by Dr. Royal Raymond Rife of San Diego, Dr. Arthur Janz Kendall of Northwestern University Medical School has seen for the first time the exceedingly minute moving bodies that apparently carry the life of bacteria when these are induced to "dis-solve" into a form that will pass through the pores of the finest porcelain filter and still remain alive and able to resume their microscopically visible form upon suitable treatment.

The work was done at the Pasadena Hospital, and will be reported in the official publication of the California Medical Association, California and Western Medicine.

The material used by Dr. Kendall was a culture of the typhoid bacillus, ordinarily a fairly large germ, easily visible under the higher powered lenses of a compound microscope. By feeding it an hot, aerobically-evolved "K medium," which apparently has the power of causing all visible bacteria to pass over into an invisible, filterable phase, Dr. Kendall induced the bacilli to his culture to go through this change. Under the highest power of the ordinary microscope, he could see nothing moving in the fluid, except a swarm of rather active little granules that were visible only at very minute points.

Small, Motile, Turquoise-Blue

Examined with the Rife microscope, however, these granules became plainly visible as small, oval, active moving bodies, turquoise blue in color. These appeared on all the cultures, and could be transferred from one culture to another through the fine-pored filters, so Dr. Kendall considers them to be the actual filterable forms of the typhoid bacillus.

He put them to another, more difficult test. Knowing that since they were all that was to be found in "K medium," cultures of some strain of bacteria, grown in regular liquid form on an immediate state in quartz culture, he tried examining samples from cultures exactly eighteen hours old.

In these he found both full sized bacilli well unchanged, and his small, turquoise-blue bodies, and in addition there were peculiarly altered bacilli whose whole substance the turquoise-blue bodies could be seen. These he holds to be bacilli caught in the act of changing from the filterable to the non-filterable phase.

This visual demonstration of the bacteria dividing, living and moving particles of the filterable phase of a bacillus is backed materially by California and Western Medicine. Of Dr. Rife's microscope the editorial says:

"Whereas our present microscopes magnify from one to two thousand diameters, in this new microscope we have an instrument for which a magnification as high as seventeen thousand diameters is claimed. This is certainly a long stride from the usual lenses of Van Leeuwenhoek, whose simple instruments may be said to have laid the foundation for the science of bacteriology which later came into being, and by means of which science much of the world's progress in many respects of the advance and better doctors has been made possible.

In the forthcoming article only major details of the new microscope itself are given. It is made known, however, that all the optical parts are of quartz instead of the usual glass, that mechanisms make possible synchronous examinations and motion pictures of the material under the lens, and that magnifications up to seventeen thousand diameters are possible. The work on Dr. Kendall's filterable typhoid germs was done at a magnification of five thousand diameters.

The light used with Dr. Rife's microscope is polarized, that is, it is passed through crystals that stop all rays except those vibrating in one particular plane. By means of a double reflecting prism built into the instrument, it is possible to turn this plane of vibration in any desired direction, controlling the illumination of the minute objects in the field very exactly. Further details regarding the mechanical construction and the optics of the sensational new instrument are promised soon.

Grand Stairway Unearthed In Ruins of Monte Alban

DIGGING in the principal plaza of the old ruined city of Monte Alban, a Mexican archeologist, Alfonso Caso of the Mexican National Museum, has unearthed a grand stairway 130 feet in width. Monte Alban was a city

TO 47,000 DIAMETERS

Magnification as great as this are claimed for the new Rife microscope, which made visible the bacteria as seen living particles in the filterable stage of the typhoid bacillus. Dr. Rife, Dr. Arthur J. Kendall, Northwestern University Medical School, and Dr. Royal Raymond Rife of San Diego, who built the instrument.

If FDA and other regulatory and licensing procedures and guidelines are observed, it is your privilege to experiment with this harmless therapy. So let's now turn to the story of the most amazing medical pioneer of our century. Royal Raymond Rife was a brilliant scientist born in 1888 and died in 1971. After studying at Johns Hopkins, Rife developed technology which is still commonly used today in the fields of optics, electronics, radiochemistry, biochemistry, ballistics, and aviation. It is a fair statement that Rife practically developed bioelectric medicine himself.

He received 14 major awards and honors and was given an honorary Doctorate by the University of Heidelberg for his work. During the 66 years that Rife spent designing and building medical instruments, he worked for Zeiss Optics, the U.S. Government, and several private benefactors. Most notable was millionaire Henry Timkin, of Timkin roller bearing fame. Because Rife was self-educated in so many different fields, he intuitively looked for his answers in areas beyond the rigid scientific structure of his day. He had mastered so many different disciplines that he literally had, at his intellectual disposal, the skills and knowledge of an entire team of scientists and technicians from a number of different scientific fields. So, whenever new technology was needed to perform a new task, Rife simply invented and then built it himself.

Rife's inventions include a heterodyning ultraviolet microscope, a microdissector, and a micromanipulator. When you thoroughly understand Rife's achievements, you may well decide that he has the most gifted, versatile, scientific mind in human history. By 1920, Rife had finished building the world's first virus microscope. By 1933, he had perfected that technology and had constructed the incredibly complex Universal Microscope, which had nearly 6,000 different parts and was capable of magnifying objects 60,000 times their normal size. With this incredible microscope, Rife became the first human being to actually see a live virus, and until quite recently, the Universal Microscope was the only one which was able view live viruses. Modern electron microscopes instantly kill everything beneath them, viewing only the mummified remains and debris. What the Rife microscope can see is the bustling activity of living viruses as they change form to accommodate changes in environment, replicate rapidly in response to carcinogens, and transform normal cells into tumor cells.

But how was Rife able to accomplish this, in an age when electronics and medicine were still just evolving? Here are a few technical details to placate the skeptics... Rife painstakingly identified the individual spectroscopic signature of each microbe, using a slit spectroscope attachment. Then, he slowly rotated block quartz prisms to focus light of a single wavelength upon the microorganism he was examining. This wavelength was selected because it resonated with the spectroscopic signature frequency of the microbe based on the now-established fact that every molecule oscillates at its own distinct frequency.

The atoms that come together to form a molecule are held together in that molecular configuration with a covalent energy bond which both emits and absorbs its own specific electromagnetic frequency. No two species of molecule have the same electromagnetic oscillations or energetic signature. Resonance amplifies light in the same way two ocean waves intensify each other when they merge together.

The result of using a resonant wavelength is that micro-organisms which are invisible in white light suddenly become visible in a brilliant flash of light when they are exposed to the color frequency that resonates with their own distinct spectroscopic signature. Rife was thus able to see these otherwise invisible organisms and watch them actively invading tissues cultures. Rife's discovery enabled him to view organisms that no one else could see with ordinary microscopes.

One was Virginia Livingston. She eventually moved from New Jersey to Rife's Point Loma (San Diego) neighborhood and became a frequent visitor to his lab. Virginia Livingston is now often given the credit for identifying the organism which causes human cancer, beginning with research papers she began publishing in 1948. In reality, Royal Rife had identified the human cancer virus first...in 1920! Rife then made over 20,000 unsuccessful attempts to transform normal cells into tumor cells. He finally succeeded when he irradiated the cancer virus, passed it through a cell-catching ultra-fine porcelain filter, and injected it into lab animals. Not content to prove this virus would cause one tumor, Rife then created 400 tumors in succession from the same culture. He documented everything with film, photographs, and meticulous records. He named the cancer virus 'Cryptocides primordiales.' Virginia Livingston, in her papers, renamed it Progenitor Cryptocides. Royal Rife was never even mentioned in her papers. In fact, Rife seldom got credit for his monumental discoveries. He was a quiet, unassuming scientist, dedicated to expanding his discoveries rather than to ambition, fame, and glory. His distaste for medical politics (which he could afford to ignore thanks to generous trusts set up by private benefactors) left him at a disadvantage later, when powerful forces attacked him. Coupled with the influence of the pharmaceutical industry in purging his papers from medical journals, it is hardly surprising that few have heard of Rife today.

Meanwhile, debate raged between those who had seen viruses changing into different forms beneath Rife's microscopes, and those who had not. Those who condemned without investigation, such as the influential Dr. Thomas Rivers, claimed these forms didn't exist. Because his microscope did not reveal them, Rivers argued

that there was "no logical basis for belief in this theory." The same argument is used today in evaluating many other 'alternative' medical treatments; if there is no precedent, then it must not be valid. Nothing can convince a closed mind. Most had never actually looked through the San Diego microscopes...air travel in the 1930's was uncomfortable, primitive, and rather risky. So, the debate about the life cycle of viruses was resolved in favor of those who never saw it (even modern electron microscopes show frozen images, not the life cycle of viruses in process).

Nevertheless, many scientists and doctors have since confirmed Rife's discovery of the cancer virus and its pleomorphic nature, using darkfield techniques, the Naessens microscope, and laboratory experiments. Rife also worked with the top scientists and doctors of his day who also confirmed or endorsed various areas of his work. They included: E.C. Rosenow, Sr. (longtime Chief of Bacteriology, Mayo Clinic); Arthur Kendall (Director, Northwestern Medical School); Dr. George Dock (internationally-renowned); Alvin Foord (famous pathologist); Rufus Klein-Schmidt (President of USC); R.T. Hamer (Superintendent, Paradise Valley Sanitarium); Dr. Milbank Johnson (Director of the Southern California AMA); Whalen Morrison (Chief Surgeon, Santa Fe Railway); George Fischer (Childrens Hospital, N.Y.); Edward Kopps (Metabolic Clinic, La Jolla); Karl Meyer (Hooper Foundation, S.F.); M. Zite (Chicago University); and many others.

Rife ignored the debate, preferring to concentrate on refining his method of destroying these tiny killer viruses. He used the same principle to kill them, which made them visible: resonance. By increasing the intensity of a frequency which resonated naturally with these microbes, Rife increased their natural oscillations until they distorted and disintegrated from structural stresses. Rife called this frequency 'the mortal oscillatory rate,' or 'MOR', and it did no harm whatsoever to the surrounding tissues. Today's Rife instruments use harmonics of the frequencies shown on the display screen. The wavelength of the actual frequency shown (770hz, 880hz, etc.) is too long to do the job.

This principle can be illustrated by using an intense musical note to shatter a wine glass: the molecules of the glass are already oscillating at some harmonic (multiple) of that musical note; they are in resonance with it. Because everything else has a different resonant frequency, nothing but the glass is destroyed. There are literally hundreds of trillions of different resonant frequencies, and every species and molecule has its very own.

It took Rife many years, working 48 hours at a time, until he discovered the frequencies which specifically destroyed herpes, polio, spinal meningitis, tetanus, influenza, and an immense number of other dangerous disease organisms.

In 1934, the University of Southern California appointed a Special Medical Research Committee to bring terminal cancer patients from Pasadena County Hospital to Rife's San Diego Laboratory and clinic for treatment. The team included doctors and pathologists assigned to examine the patients - if still alive - in 90 days.

After the 90 days of treatment, the Committee concluded that 86.5% of the patients had been completely cured. The treatment was then adjusted and the remaining 13.5% of the patients also responded within the next four weeks. The total recovery rate using Rife's technology was 100%.

On November 20, 1931, forty-four of the nation's most respected medical authorities honored Royal Rife with a banquet billed as The End To All Diseases at the Pasadena estate of Dr. Milbank Johnson.

But by 1939, almost all of these distinguished doctors and scientists were denying that they had ever met Rife. What happened to make so many brilliant men have complete memory lapses? It seems that news of Rife's miracles with terminal patients had reached other ears. Remember our hypothetical question at the beginning of this report: What would happen if you discovered a cure for everything? You are now about to find out....

At first, a token attempt was made to buy out Rife. Morris Fishbein, who had acquired the entire stock of the American Medical Association by 1934, sent an attorney to Rife with 'an offer you can't refuse.' Rife refused. We may never know the exact terms of this offer. But we do know the terms of the offer Fishbein made to Harry Hoxsey for control of his herbal cancer remedy. Fishbein's associates would receive all profits for nine years and Hoxsey would receive nothing. Then, if they were satisfied that it worked, Hoxsey would begin to receive 10% of the profits. Hoxsey decided that he would rather continue to make all the profits himself. When Hoxsey turned Fishbein down, Fishbein used his immensely powerful political connections to have Hoxsey

arrested 125 times in a period of 16 months. The charges (based on practice without a license) were always thrown out of court, but the harassment drove Hoxsey insane.

But Fishbein must have realized that this strategy would backfire with Rife. First, Rife could not be arrested like Hoxsey for practising without a license. A trial on trumped-up charges would mean that testimony supporting Rife would be introduced by prominent medical authorities working with Rife. And the defense would undoubtedly take the opportunity to introduce evidence such as the 1934 medical study done with USC. The last thing in the world that the pharmaceutical industry wanted was a public trial about a painless therapy that cured 100% of the terminal cancer patients and cost nothing to use but a little electricity. It might give people the idea that they didn't need drugs.

And finally, Rife had spent decades accumulating meticulous evidence of his work, including film and stop-motion photographs. No, different tactics were needed...

The first incident was the gradual pilfering of components, photographs, film, and written records from Rife's lab. The culprit was never caught.

Then, while Rife struggled to reproduce his missing data (in a day when photocopies and computers were not available), someone vandalized his precious virus microscopes. Pieces of the 5,682 piece Universal microscope were stolen. Earlier, an arson fire had destroyed the multi-million dollar Burnett Lab in New Jersey, just as the scientists there were preparing to announce confirmation of Rife's work. But the final blow came later, when police illegally confiscated the remainder of Rife's 50 years of research. Then in 1939, agents of a family which controlled the drug industry assisted Philip Hoyland in a frivolous lawsuit against his own partners in the Beam Ray Corporation. This was the only company manufacturing Rife's frequency instruments (Rife was not a partner). Hoyland lost, but his assisted legal assault had the desired effect: the company was bankrupted by legal expenses. And during the Great Depression, this meant that commercial production of Rife's frequency instruments ceased completely. And remember what a universal cure meant to hospitals and research foundations? Doctors who tried to defend Rife lost their foundations grants and hospital privileges.

On the other hand, big money was spent ensuring that doctors who had seen Rife's therapy would forget what they saw. Almost no price was too much to suppress it. Remember that, today, treatment of a single cancer patient averages over \$300,000. It's BIG business.

Thus, Arthur Kendall, the Director of the Northwestern School of Medicine who worked with Rife on the cancer virus, accepted almost a quarter of a million dollars to suddenly 'retire' in Mexico. That was an exorbitant amount of money in the Depression. Dr. George Dock, another prominent figure who collaborated with Rife, was silenced with an enormous grant, along with the highest honors the AMA could bestow. Between the carrots and the sticks, everyone except Dr. Couche and Dr. Milbank Johnson gave up Rife's work and went back to prescribing drugs.

To finish the job, the medical journals, support almost entirely by drug company revenues and controlled by the AMA, refused to publish any paper by anyone on Rife's therapy. Therefore, an entire generation of medical students graduated into practice without ever once hearing of Rife's breakthroughs in medicine.

The magnitude of such an insane crime eclipses every mass murder in history. Cancer picks us off quietly...but by 1960 the casualties from this tiny virus exceeded the carnage of all the wars America ever fought. In 1989, it was estimated that 40% of us will experience cancer at some time in our lives.

In Rife's lifetime, he had witnessed the progress of civilization from horse-and-buggy travel to jet planes. In that same time, he saw the epidemic of cancer increase from 1 in 24 Americans in 1905 to 1 in 3 in 1971 when Rife died.

He also witnessed the phenomenal growth of the American Cancer Society, the Salk Foundation, and many others collecting hundreds of millions of dollars for diseases that were cured long before in his own San Diego laboratories. In one period, 176,500 cancer drugs were submitted for approval. Any that showed 'favorable' results in only one-sixth of one percent of the cases being studied could be licensed. Some of these drugs had a mortality rate of 14-17%. When death came from the drug, not the cancer, the case was recorded as a 'complete' or 'partial remission' because the patient didn't actually die from the cancer. In reality, it was a race to see which would kill the patient first: the drug or the disease. The inevitable conclusion reached by Rife was

that his life-long labor and discoveries had not only been ignored but probably would be buried with him. At that point, he ceased to produce much of anything and spent the last third of his life seeking oblivion in alcohol. It dulled the pain and his acute awareness of half a century of wasted effort - ignored - while the unnecessary suffering of millions continued so that a vested few might profit. And profit they did, and profit they do.

In 1971, Royal Rife died from a combination of valium and alcohol at the age of 83. Perhaps his continual exposure to his own Rife frequencies helped his body endure abuse for so many years. Fortunately, his death was not the end of his electronic therapy. A few humanitarian doctors and engineers reconstructed his frequency instruments and kept his genius alive. Rife technology became public knowledge again in 1986 with the publication of *The Cancer Cure That Worked*, by Barry Lynes, and other material about Royal Rife and his monumental work. There is wide variation in the cost, design, and quality of the modern portable Rife frequency research instruments available. Costs vary from about \$1200 to \$3600 with price being no legitimate indicator of the technical competence in the design of the instrument or performance of the instrument. Some of the most expensive units have serious technical limitations and are essentially a waste of money. At the other extreme, some researchers do get crude results from inexpensive simple, unmodified frequency generators, but this is just as misguided as spending too much money. Without the proper modifications, the basic frequency generator gives only minimal and inconsistent results. Please recall that the actual destruction of the viruses and bacteria, etc. is not accomplished by the frequency displayed on these cheap generators, but by certain shorter harmonics of that particular frequency which are often blocked by the crudity of a cheap and rudimentary instrument itself.

This very problem led Rife to ultimately abandon the 'ray tube' design in favor of today's version. The newer technology applies the frequencies and their harmonics to the body through the use of hand-held, footplate, or stick-on electrodes. Proper frequency exposure and flushing of the body with large amounts of clean, pure water is critical to achieve the kind of results Rife got. These procedures are fully explained in the manuals of the best units on the market.

So, unless you would be satisfied with sporadic results for minor conditions, it is suggested you use only the highest quality equipment and only the proper, proven procedures in your personal research. If you do, you may discover that nothing can approach what can be achieved through the application of these safe, time-tested frequencies (many for over 65 years)- and all without drugs, surgery, or radiation.

One day, the name of Royal Raymond Rife may ascend to its rightful place as the giant of modern medical science. Until that time, his fabulous technology remains available only to the people who have the interest to seek it out. While perfectly legal for veterinarians to use to save the lives of animals, Rife's brilliant frequency therapy remains taboo to orthodox mainstream medicine because of the continuing threat it poses to the international pharmaceutical medical monopoly that controls the lives - and deaths - of the vast majority of the people on this planet.

This is a compilation of frequencies from many sources. Many are based on anecdotes and are not well tested or widely used. Some are based on John Garvy (founder of SonRidge Health Centers) frequencies many of which are above audio range and converted by dividing by 64 and rounding, which may significantly affect response. Ditto for Hulda Clark frequencies a few of which are included and divided by 512. See their works to view more, and unconverted, frequencies, especially if a specific pathogen is known.

This list is also annotated but, of course, not completely. Research will still be necessary to ascertain causative pathogens for certain conditions. Many of the comments and annotations are from other frequency lists and many are from my own research.

Some frequency sets have "secondaries" which are extra frequencies to run if there is no response to the first set, or run along with the initial set to more assure response. Some contain numbered sets like (1), (2), and (3) which usually indicate single anecdotes but these may represent what worked when all other frequency sets failed. Ones marked with (exp) are experimental, which is quite the misnomer since all the frequencies should be considered experimental anyway.

Most people use the base frequencies (727/728, 784/786/787, 880, 464/465) in every session since they address a number of common pathogens which can be easily reinfected. Many typically use cleansing, relaxing, and general frequencies such as 304, 5000, 10000, and 3176 to finish sessions.

Many frequency sets state to "see" or "use" other frequencies. Ones to "see" may be causative agents and should be used if there is no response to the initial set, like the "secondary" ones explained above. Ones to "use" are highly probable factors and should be used as part of the initial set. Further research and use yields a constant supply of new frequencies and this list is updated often.

There are possibly four ways that rife frequencies can be of use to you

Direct destruction

If you have a micro-organism, and you know the frequency, you can destroy it. If a client has a terrible case of Shingles, we know that that is caused by Herpes. Simply set the Rife Machine to the Herpes frequency 1552, and let it run for 1/2 an hour. In most cases, it will be gone in less than 3 days.

Plagues and epidemics

Looking through this chart you may be wondering, what use is a frequency to destroy the Bubonic Plague today. Aside from the morbid reality of Germ Warfare, hasn't the Bubonic Plague been wiped off the face of the Earth? Actually no, there are several reported cases every year. Of course, the odds of being one of the 10 or so people who get it every year are quite slim. However, almost everyone alive today who is of European decent is a descendant of a survivor of the Black (Bubonic) plague. That means that you can probably trace a direct blood line through the placenta along the female side, or the sperm and prostatic fluid on your fathers side of your family to a person who was infected with the Plague centuries ago. Homeopaths call this a miasm.

Don't be surprised if you, or one of your clients feels a slight tingling in the armpits (the Plague caused the lymph nodes to swell up) on this frequency. Does that mean you have an active form of the Bubonic Plague? No, but a watered down version of it may have been passing through your family blood line for the last 400 years, which may have been causing some health problems.

Immunizations

How about Diphtheria, or Rubella? Everyone in the U.S.A. gets a DPT shot when they are children. DPT stands for Diphtheria, Pertussis and Tetanus. That means that some part of these micro-organism, were injected into the body, past the defenses of the intestinal tracts and the skin. Did part of the virus survive? The unfortunate reactions that some children have to these immunizations (death, mental retardation, immune dysfunction et. al.) every year tells us that these immunizations are not always deactivated before they are injected.

Families of micro-organisms

Gonorrhea is not a problem in developed countries, but the frequency for Gonorrhea is the most useful frequency when it comes to the common cold. Either the common cold is a respiratory version of Gonorrhea, or shares enough of the same structure as to be destroyed by the same frequency as Gonorrhea. Thus, although the Rife Machine is set for 20 frequencies, each frequency may be capable of destroying 100's different but similarly structured micro-organisms. One session may destroy 2000 different types of unwanted life-forms. Rife himself believed that there were at most 10 families of disease producing organisms.

The origin of the MORs (Mortal Oscillatory Rates or " Mortality Oscillator Rates" of bacteria and viruses), originally discovered by Royal Rife during the first half of the twentieth century, has perplexed many people since that time. While it is generally acknowledged that some type of resonance phenomenon destroyed or debilitated the organisms, it has been difficult at best to pinpoint any association of specific frequency with what is physically affecting these life forms during the time of their debilitation or demise.

304 - Sedation or pain relief, also nice to use as the last frequency of a set of frequencies 432, 484, 610, 690, 790 and 864 - Lyme disease - Please note the use of these frequencies has produced what is known as a Herxheimer Reaction. As the spirochetes die, they release a protein toxin that can produce joint pains, weakness, and general malaise for a few days following exposure. It has been suggested that one start slow with but a minute of exposure and then gradually increase the exposure time. One should not repeat an exposure until all effects and symptoms of the previous exposure have cleared.

676 - Helicobacterium Pylori - linked as a causative agent in stomach ulcers.

728 - A type of Cancer cell found in blood of people with Multiple Myeloma. Causes the cells to disintegrate according to one researcher.

728, 800, 880 , 7760, 8000, 8250 - Flu virus

2050, 2180, 2452 - Non responsive to Cancer at 2128 or 2008. It has been suggested that these Cancers are formed in response to some different stimulus than commonly occurs.

664, 764 - very beneficial for emotional ties to diseases. 664 has apparently caused people to giggle especially in a group exposure setting.

660, 728, 787 Epstein Barr virus also has been used for Mononucleosis.

1234, 3672, 7344 Opens bronchioles makes breathing easier seems to be helpful for asthmatics. Also is quite sedating.7344 seems to work best of the three.

1489, 1500, 1550, 2489 Herpes - relieves acute outbreak, but does not remove dormant form from body. Use of 2489 for about 30 minutes seems to provide long term benefits.
 470 - stopped involuntary tremors in left hand of a person with multiple sclerosis.
 463 and 466 stopped involuntary tremors in a person with brain tumors.
 915 and 918 plantar wart - use long exposure time - 15 to 30 minutes on each frequency.
 2050 and 2250 used to correct chronic prostatitis - 10 to 15 minutes on each frequency. Use for a short interval will aggravate prostatitis!
 3.6 and 6.3 Hz have been reported as being able to keep a person from becoming angry
 72, 95, 190, 304 - Used for nausea and abdominal cramping
 866, 430, 2213, 620 Chlamydia infections.
 6000 - A master Central Nervous System Frequency. Release of emotional problems, blocked seizures - but does nothing once seizure starts, stopped tremors in hands in person with Parkinson's disease.
 Hepatitis C - used by a Dr. in France to good effect. Exposures were of only 45 seconds on each frequency. Longer exposures had no effect. 728, 166, 224, 317, 727, 787, 880, 2189
 Multiple Sclerosis - Use of 5000 Hz for 30 minutes every other day, used the above Hep C protocol on alternate days. So one day 5000, next day Hep C. One should start the 5000 at about 10 minutes and work up in time slowly watching for detox reactions.
 Psoriasis - From New Zealand comes this protocol 2180, 2128, 2008, 1552, 880, 784, 664, 304
 Systemic Lupus Erythematosus (SLE) - the above sequence for psoriasis has been used on one person with a severe active case of SLE with beneficial results.
 Fruit Flies - 2167Hz reported by someone in the Netherlands
 Chronic Fatigue Syndrome - 2127 , 465, 660, 666, 727, 787, 880, 1550. Also used parasite frequencies
 Round Worms - 104, 332, 422, 721, 942, 3212, 240, 688, 20, 120
 Flukes - 143, 275, 676, 763, 524, 854, 945, 651, 435, 524
 Relieves the need to worry - very handy at times. - 6130Hz
 Basal Cell Skin Carcinoma - 2116, 760, 2280 direct exposure of the lesion to light from the tube helps as does pulsing the audio output. About 30 minutes exposures at 2116 seemed optimal, 760 and 2280 at 5 minutes each.
 Lists of frequencies. Last part is 132 col format.
 Use non-proportional font to display so the columns line up, if desired. The first list in this file are frequencies from James Bare. These should be considered the most reliable (the non-theoretical ones, anyway).
 My limited use of the Garvey frequencies indicate they may be useful, especially since there are specific ones for maladies, which can be used by the common, typical ones.

=====

The following is a listing of these known MORs as compiled by Dr. Robert P. Stafford, M.D. a physician who worked with an original Rife machine from 1957 to 1963:

Microorganism Frequency in Hertz

Tetanus 120
 Treponema 660
 Gonorrhea 712
 Staphlococci 728
 Pneumococci 776
 Streptothrix (fungus) 784
 Streptococci 880
 Typhoid Bacteria 712
 Typhoid Virus 1862

Tuberculosis Rod Form 803
 Tuberculosis Virus 1552 (same as B-Coli)

Sarcoma (all forms) 2008
 Carcinoma (all forms) 2128
 =====

In that vein, here is a list that I've compiled. The format is frequency, what it supposedly effects, device, source
 If the 'device' field says 'theory' it means that someone said this might work, but no-one has actually said anywhere that they've used it.
 If the 'device' field says 'theory/440' then I took the frequency from Hulda Clark's book "The Cure For All Diseases" and divided by 440.

Notes:

1. Frequency codes 14, 16, 17, 20 and 28 affect more microbes and conditions than all other frequencies combined.
2. The second most effective group of frequencies is; 29, 42, 45, 48, 58 and 86. These are mainly used for parasites and amoebae.
3. Frequencies in the range of 11 to 29 produce the most rapid response, usually within 6 hours.
4. Frequencies in the range of 60 to 85 are those that seem to occur naturally in the brain. It is thought that behaviour can be influenced with harmonics of those same frequencies during behaviour of the opposite type. For example, to reduce/eliminate anger, one would apply a freq. of 6.3 Hz (code# 71).
See comments for those ranges.
5. Any good quality square-wave generator, such as those recommended for use with the James Bare Rife Device, should be able to output most or all of the Actual Frequencies listed in this document.

{ ALL FOLLOWING is an extensive list of frequencies from many different sources scanned in and provided by Reid Smith. There are a number of scanner errors, typically "l" when should be an "i", as well as the number "0" being scanned as "e", "o", or "a", and many others. Try to verify frequencies before use due to possible scanning errors. It should be viewed in a fixed font for columns to aline. I know nothing about "magic windows", color frequency therapy, or "weird effects." -- turf }

>>>>>>>>>included file>>>>>>>>>

In reference to moles changing with use of device I have a pad type unit which includes a manual with lots of frequencies. This manual warns: 1840 & 1910 HZ are known to have serious deleterious effects including stimulation of malignant growths. Also, it warns about possible detrimental problems with freq range 1000 to 2000 HZ.

=====

802 Hz. should not be used if a healthy colon is involved, as it will kill both beneficial and detrimental bacteria.

Interesting, useful and weird frequencies

5 Hz: Alleged sphincter resonance (not good)

7 Hz: Mass aggregate frequency (can deaggregate matter), alleged to resonate and rupture organs at excessive intensity

7.5 Hz: (?) Earth magnetic field frequency, useful theta (brain) waves frequency

7.83 Hz: Earth resonance frequency

13 Hz: Alleged sphincter resonance (not good)

46.98 Hz (use with 62.64 and 70.47) Useful for weird effects

62.64 Hz (use with 46.98 and 70.47) Useful for weird effects

70.47 Hz (use with 46.98 and 62.64) Useful for weird effects

305 Hz: Rife frequency to kill Lyme disease

312 Hz: Rife frequency to kill Lyme disease

345 Hz: Rife frequency to kill Lyme disease

432 Hz: Rife frequency to kill Lyme disease

620 Hz: Keely Frequency (use with 630 and 12000)

630 Hz: Keely Frequency (use with 620 and 12000)

864 Hz: Main Rife frequency to kill Lyme disease

2000 Hz: Commonly used Rife frequency

2000 Hz (plus a small amount): Alleged to cure a cancer

2025 Hz: Proton precession/water resonance

3000 Hz: (approximate) Mentioned as a Rife frequency

12000 Hz: Keely Frequency (use with 620 and 630)

38000-40000 Hz: Magic window

42800 Hz: Aetheric dissociation/water resonance (water -> aetheric force)

150-160 kHz: Magic window

180 KHz: Ferromagnetism

1.1-1.3 MHz: Magic window

388 MHz: Alleged to cause damage/disruption of humans

488 MHz: Same as 388 MHz, but I think it was a mistake, and 388 was meant

1.057 GHz: Magic window

2.450 GHz: Standard microwave oven frequency, but no resonance

Somewhere in the Infrared: Magic window

The life energy frequency (in the near ultraviolet): Magic window

turf's Frequency Lists

Here're a few freq sets. Sorry they are so long - I take every relevant freq I can find for the condition and run it, so they are generally applicable to a broad spectrum of potential pathogens. I would like to be able to identify the "best" freqs. This may not be possible without correct diagnosis (culture, e.g.), so maybe this is the best that can typically be done. The head/chest "colds" being treated with below freqs may very well be caused by bacteria and viral ones will not be cured by these sets. Frequencies are listed in numerical order. I don't think it matters in what order they are run. I think that if any freq between 800 and 850(?) (esp 832) is used, a tablespoon or more of yogurt or a beneficial bacteria supplement should be used afterward.

IMPORTANT NOTES: Unless otherwise noted, general antiseptic frequencies (728, 784, 880, 464) should be used in addition to sets below and these will typically produce the most effect, such that the long list may not have to be used.

DON'T FORGET THEM!

In many cases, diseases are caused or contributed by lack of nutrients and toxin accumulation. These must be addressed. For example, it is unlikely that MS can be helped a great deal without adequate vitamin E, magnesium, selenium, and other nutrients, and lasting improvement or maintenance will not be achieved without removing mercury or other toxins. See individual regimens in maladies section of

homepage for regimens in addition to frequencies below.

 IN addition to any freq set below, use 728, 784, 880, 464.

Infections - Chest, ear, sinus, head colds. All have the potential to be interrelated, so if one set does not work, the freqs from another set can be used if there is not a profound improvement within 24 hours.

Sinus infection/head cold

20, 72, 120, 146, 160, 185, 333, 367, 456, 522,
 802, 820, 952, 1500, 1550, 4400**, 5000, (728, 784, 880, 464)
 Run 728 and any that can be felt for 5 minutes, the others for 3.
 * Run 784, then 784 to 787 sweep. If no sweep, use 784 then 786.
 I use sweep rate of 0.25 (4hz) for small diffs like this.
 ** Try scanning up and down by 8's (I sweep 4384 to 4416 at 4Hz).

Chest infection/cold

20, 120, 333, 412, 452, 464, 683, 766, 776, 1474,
 4400**, 5000, 7344, 10000, (728, 784, 880, 464)
 Run 766 (and any other that can be felt) for 5 minutes,
 the others for 3 minutes.
 ** Try scanning up and down by 8's (I sweep 4384 to 4416 at 4Hz).

Ear infection

9.19, 20, 158, 201, 340, 440, 535, 542, 645, 652, 683,
 801, 803, 875, 885, 1552, (728, 784, 880, 464)
 Follow with 875-885 sweep.
 Again, if not a definite improvement, try another set. For example, if an ear infection does not get better in 24 hours after using the ear infection freqs, use the head/sinus ones, and if no improvement in 24 hours after that, use the chest protocol.

Chronic Conditions

If the condition is chronic or there is no immediate improvement, add mold freqs:
 866, 1823, 524, 374, 743, 702, 942, 853.
 Presently (5/98), 866 is very valuable and should be used with any freq set above.
 If these do not help, use the roundworm frequencies (20, 120, 650, 800) - use nonredundant ones if already in set.
 If no improvement with these, use a more comprehensive parasite set.
 General virus freqs (600, 625, 650, 666, 690) can also be tried if no relief.
 Recent case of throat and tonsil infection that lasted a month and caused congestion, coughing, low grade fever, and sore throat (cultured negative to strep) was apparently actinomyces israeli - 222, 262, 2154

Parasite Sets

Full set contains freqs for many of the more common pathogenic parasites but there are many that are not listed. See the frequency lists (especially the Garvey) for specific frequencies for diagnosed parasites if necessary. The short parasite set contains freqs for the most common parasites and is likely all that is needed by most, but if parasitic illness

Candida and fungal infections

254.2, 866, 1403, (728, 784, 880, 464)

If no lasting benefit from these, use parasite sets (esp roundworm freqs) in addition until cured. Most effective yeast freq is 464 (don't forget it).

Other freqs to try -

72, 422, 582, 727, 787, 802, 1016, 1134, 1153, 1550, 2222

Multiple Sclerosis

20, 143, 275, 430, 470, 524, 620, 624, 802, 840, 854, 1550, 2213, 5000, (728, 784, 880, 464)

These are chlamydia, fluke, and general MS freqs. Consider using 5000 for long periods (like 5-10 minutes after building up).

Moles

20, 120, 177, 600, 625, 626, 650, 659, 660, (728, 784, 880, 464)

These are general mole plus syphilus frequencies.

MASTER LIST

This table is a little rough on layout rather than alter the original copy.

<XMP> MASTER RATE SHEET GUIDELINES All frequencies are given in Hertz at 4 to 5 volts SQUARE WAVE. Electrodes are to be applied directly onto the skin with a non-menthol shaving cream or electrode gel. Do not use oils or creams as they will insulate the transference of the energy to the body. In general: Drink one quart of polarized positive water with juice of lemon daily. Drink electrolyte solution 20 minutes before electromagnetic application. Electrolyte solution is made by adding 1/2 teaspoon riko polishings, 1/2 teaspoon granular tedthin, and 1/2 teaspoon whey INTO 1/2 glass of polarized positive water. You can polarize the water positive by placing the glass of water on a ceramic magnet ("polarizer") with the south side facing up for at least 2 minutes. Drink 1/4 teaspoon of Acidophilus in 1/2 glass of polarized positive water after energy application. COLOR POWER: Use 500 to 1000 watt projectors for one hour; minimum time between energy to be 3 hours. Use 150 watt color flood lamps for 1 and 1/2 hours minimum from head to toe. Use 40 watt color lamps for 2 and 1/4 hours. See pages 9-23 to 9-31 for details. Eyes: Use 12 watt lamps at 12 volts. ;see: page 6-17 for application times. Nt~ERICAL COLOR CODE AS USED IN RATE CHART: 1...RED 2...ORANGE 3...YELLOW 4...LEMON 5...GREEN 6...TURQUOISE 7...BLUE 8...INDIGO 9...VIOLET 10...PURPLE 11...MAGENTA 12...SCARLET SEE PACE 613 TO 616. MAGNETIC THERAPY METHODS FOR SECTIONS 1-1 TO 7-12 MAY BE FOUND ON PAGE 609 to find FURTHER INFORMATION ABOUT MAGNETIC POLARITY MAY BE FOUND ON THE FOLLOWING PAGES: 356 to 357. 385 to 386. 389 to 412. 573 to 578. and 602 to 608. These method numbers are placed in brackets, for example, [10,14,8]. P.R.M. section and page numbers are mixed in with the method numbers, and are given in the order that they should be used. Updated Frequency List

This list is a compendium of frequencies that have been reported tby users of a device to have actual physiologic effects. Some of these are well know frequencies, used in a unique sequence, others are completely new heretofore unknown frequencies. This list will be updated as results are reported to me, all information should be considered as anecdotal, and not scientifically proven. These frequencies should not be considered as anything but experimental. USE AT YOUR OWN RISK, NO CLAIMS ARE MADE FOR EFFECTIVENESS.

304 - Sedation or pain relief, also nice to use as the last frequency of a set of frequencies

Fibromyalgia and Joint Pains - This set has many positive reports of symptomatic relief lasting from several days to almost a week. 650, 625, 600, 240, 95, 522, 2900, 28 .

Lyme Disease 432, 484, 610, 690, 790, and 864 - Please note the use of these frequencies has produced what is known as a Herxheimer Reaction. As the spirochetes die, they release a protein toxin that can produce joint pains, weakness, and general malaise for a few days following exposure. It has been suggested that one start slow with but a minute of exposure and then gradually increase the exposure time. One should not repeat an exposure until all effects and symptoms of the previous exposure have cleared.

Lyme Disease - reported 2001 - all the above plus - 652, 1103, 1500, 4200, 450, 465.

Helicobacter Pylori - 676 linked as a causative agent in stomach ulcers.

728 - A type of Cancer cell found in blood of people with Multiple Myeloma. Causes the cells to disintegrate according to one researcher.

Flu Virus 728, 800, 880 , 7760, 8000, 8250

2050, 2180, 2452 - Non responsive to Cancer at 2128 or 2008. It has been suggested that these Cancers are formed in response to some different stimulus than commonly occurs.

Cataracts - 1830, 1600, 9999, 1552, 2110, 1335, 1654, 2187, 2195, 2211

664, 764 - very beneficial for emotional ties to diseases. 664 has apparently caused people to giggle especially in a group exposure setting.

660, 728, 787 Epstein Barr virus also has been used for Mononucleosis.

1234, 3672, 7344 Opens bronchioles makes breathing easier seems to be helpful for asthmatics. Also is quite sedating.7344 seems to work best of the three.

Sharpens Eyesight 350, 360

Herpes Zoster 1489, 1500, 1550, 2489 - relieves acute outbreak, but does not remove dormant form from body. Use of 2489 for about 30 minutes seems to provide long term benefits.

Menieres Disease - Removed all pain associated with. 9 Hz.

Hand Tremors 470 - stopped involuntary tremors in left hand of a person with multiple sclerosis.

463 and 466 stopped involuntary tremors in a person with brain tumors.

915 and 918 plantar wart - use long exposure time - 15 to 30 minutes on each frequency.

Prostatitis 2050 and 2250 - 10 to 15 minutes on each frequency. Use for a short interval will aggravate prostatitis!

3.6 and 6.3 Hz have been reported as being able to keep a person from becoming angry

Nausea and abdominal cramps 72, 95, 190, 304

Chlamydia infections 866, 430, 2213, 620

6000 - A master Central Nervous System Frequency. Release of emotional problems, blocked seizures - but does nothing once seizure starts, stopped tremors in hands in person with Parkinson's disease.

Hepatitis C - used by a Dr. in France to good effect. Exposures were of only 45 seconds on each frequency. Longer exposures had no effect. 728, 166, 224, 317, 727, 787, 880, 2189

Multiple Sclerosis - Use of 5000 Hz for 30 minutes every other day, used the above Hep C protocol on alternate days. So one day 5000, next day Hep C. One should start the 5000 at about 10 minutes and work up in time slowly watching for detox reactions.

Psoriasis - From New Zealand comes this protocol 2180, 2128, 2008, 1552, 880, 784, 664, 304

Systemic Lupus Erythematosus (SLE) - 633, 2125, 2008, 3612, 802, 2489, 702

Fruit Flies - 2167Hz reported by someone in the Netherlands

Chronic Fatigue Syndrome - 2127 , 465, 660, 666, 727, 787, 880, 1550. Also used parasite frequencies

Round Worms - 104, 332, 422, 721, 942, 3212, 240, 688, 20, 120

Flukes - 143, 275, 676, 763, 524, 854, 945, 651, 435, 524

Incessant worrying - 6130Hz

Gall Bladder- 20, 727, 787, 880, 5000

Pleural Effusion - 787, 474, 612, 361

Basal Cell Skin Carcinoma - 2116, 760, 2280 direct exposure of the lesion to light from the tube helps as does pulsing the audio output. About 30 minutes exposures at 2116 seemed optimal, 760 and 2280 at 5 minutes each.

Electrical wave forms

One of the benefits of working with electrical stimulation is the ability to generate precise and complex waveforms. It is likely that specific waveforms have specific functions. Brain stimulation, frequencies and waveforms are a vast and promising field of experimentation for alchemists.

Updated Frequency List

This list is a compendium of frequencies that have been reported by users of the device to have actual physiologic effects. Some of these are well know frequencies, used in a unique sequence, others are completely new heretofore unknown frequencies. This list will be updated as results are reported to me, all information should be considered as anecdotal, and not scientifically proven. These frequencies should not be considered as anything but experimental. USE AT YOUR OWN RISK, NO CLAIMS ARE MADE FOR EFFECTIVENESS.

304 - Sedation or pain relief, also nice to use as the last frequency of a set of frequencies

Fibromyalgia and Joint Pains - This set has many positive reports of symptomatic relief lasting from several days to almost a week. 650, 625, 600, 240, 95, 522, 2900, 28 .

Lyme Disease 432, 484, 610, 690, 790, and 864 - Please note the use of these frequencies has produced what is known as a Herxheimer Reaction. As the spirochetes die, they release a protein toxin that can produce joint pains, weakness, and general malaise for a few days following exposure. It has been suggested that one start slow with but a minute of exposure and then gradually increase the exposure time. One should not repeat an exposure until all effects and symptoms of the previous exposure have cleared.

Lyme Disease - reported 2001 - all the above plus - 652, 1103, 1500, 4200, 450, 465.

Helicobacter Pylori - 676 linked as a causative agent in stomach ulcers.

728 - A type of Cancer cell found in blood of people with Multiple Myeloma. Causes the cells to disintegrate according to one researcher.

Flu Virus 728, 800, 880 , 7760, 8000, 8250

2050, 2180, 2452 - Non responsive to Cancer at 2128 or 2008. It has been suggested that these Cancers are formed in response to some different stimulus than commonly occurs.

Cataracts - 1830, 1600, 9999, 1552, 2110, 1335, 1654, 2187, 2195, 2211

664, 764 - very beneficial for emotional ties to diseases. 664 has apparently caused people to giggle especially in a group exposure setting.

660, 728, 787 Epstein Barr virus also has been used for Mononucleosis.

1234, 3672, 7344 Opens bronchioles makes breathing easier seems to be helpful for asthmatics. Also is quite sedating.7344 seems to work best of the three.

Sharpens Eyesight 350, 360

Herpes Zoster 1489, 1500, 1550, 2489 - relieves acute outbreak, but does not remove dormant form from body. Use of 2489 for about 30 minutes seems to provide long term benefits.

Menieres Disease - Removed all pain associated with. 9 Hz.

Hand Tremors 470 - stopped involuntary tremors in left hand of a person with multiple sclerosis.

463 and 466 stopped involuntary tremors in a person with brain tumors.

915 and 918 plantar wart - use long exposure time - 15 to 30 minutes on each frequency.

Prostatitis 2050 and 2250 - 10 to 15 minutes on each frequency. Use for a short interval will aggravate prostatitis!

3.6 and 6.3 Hz have been reported as being able to keep a person from becoming angry

Nausea and abdominal cramps 72, 95, 190, 304

Chlamydia infections 866, 430, 2213, 620

Multiple Sclerosis - Use of 5000 Hz for 30 minutes every other day, used the above Hep C protocol on alternate days. So one day 5000, next day Hep C. One should start the 5000 at about 10 minutes and work up in time slowly watching for detox reactions.

Psoriasis - From New Zealand comes this protocol 2180, 2128, 2008, 1552, 880, 784, 664, 304

Magic Windows

Magic windows are frequencies which (according to Thomas E. Bearden) are especially suited for coupling to and bringing energies from other dimensions. These are the frequencies:

38-40 kHz

150-160 kHz

1.1-1.3 MHz

1.057 GHz

Somewhere in the Infrared

The life energy frequency (in the near ultraviolet)

These frequencies were found in the "Excalibur Briefing", a book on the paranormal and new science, by Bearden.

38-40 kHz was mentioned in a incident of a strange light being seen, and it appears to be described as a promising frequency range. It is also low enough to be easy to experiment with.

150-160 kHz is also not too high. I also heard that 160-180 kHz is declared an experimenters band by the FCC, but I can not substantiate that. If so, 160 kHz would be a promising frequency indeed.

1.1-1.3 MHz is kind of high to easily produce. It also unfortunately is extremely regulated by the FCC, so watch your emissions! Why you ask?

1.1-1.3 MHz is 1100-1300 kHz which is ... 1100-1300 on your AM dial. It would be REALLY bad to those commercial AM radio. Not nice at all. Bad for you, and bad for all those people who want to listen to their favorite radio station in that band. So don't do it!

1.057 GHz is the Lamb shift. Has something to do with emission lines shifting. Extremely high, hard to produce without a magnetron or something similar. Possibly could cook you. By the way, microwave ovens run at 2.45 GHz, so 1.057 GHz, being almost half that value, may be too close for comfort.

Somewhere in the infrared region is a magic window.

The last one, the "life energy" frequency is in the near ultraviolet. Obviously you can't use purely electronic means to produce it, since it is optical. Wavelength is the unit of choice here, as for the frequency, I think it is around 10^{15} Hz (10 PHz, i.e. 10 petaHertz), i.e. extremely fast. This was probably the frequency used by the Russian scientist Vlail P. Kaznacheyev in his experiment. The result of the experiment, the Kaznacheyev effect, is that if a cell culture is killed or injured, and the "death" photons from it are sent to another culture,

which in the absence of visible light (which would quench the paranormal effects, see the abovementioned Excalibur Briefing), suffers the same effects. This is called death transmission via the paranormal channel. Perhaps using different filters one could narrow down the wavelength and frequency. Possibly by phase-conjugating (time-reversing) death photons one could achieve cures for disease.

WARNING and DISCLAIMER

Just because I researched these frequencies, do not assume that I advocate treatment using them. They are intended as a guide to further research.

Providing adequate nutrition as well as removing and avoiding toxins can be as important as bioelectronic regimens.

Some frequency sets state they are for use on lab animals only. This is generally because the frequencies may cause unintended side effects. For example, thrombophlebitis (vein inflammation caused by a clot) is listed as such since if a clot is dislodged, it can cause stroke, heart attack, or embolism. People with certain conditions will experience detox reactions to some frequency sets that can be severe and if not handled properly and frequencies limited in duration, life threatening.

Psoriasis ---- (Requires long-term treatment, since the immune system continues to be programmed to attack the skin long after the offending organism, which has markers similar to skin, has been eliminated. Condition may improve over time with use of parasite frequencies and fresh vegetable juice. Condition will gradually deteriorate with dietary abuse of sugar & starch). The following frequencies may be useful:

IMPORTANT NOTE FOR RESEARCHERS:

Pyorrhoea may contribute toxins which bypass the blood-brain barrier (impossible according to conventional wisdom, yet clearing pyorrhoea eliminates headaches and bizarre behaviour).

Although pyorrhoea may be controlled or eliminated with treatment, infection will always return with stress or poor diet, until mercury inlays (so-called silver" fillings) and nickel alloy ("stainless steel") dental appliances are replaced with Porcelain (without uranium content).

These toxic metals weaken the immune system and encourage reinfection. Also, for some individuals on a high sugar diet gold and palladium have a toxic effect on the immune system and heart. Alumina in ceramic bridges has now been associated with memory lapses and possibly Alzheimer's Disease.

A mouthwash of ordinary drugstore variety hydrogen peroxide (3%) is helpful in controlling infection at the gum line, but will not affect the hidden, deep seated infection below.

(Please note that although most of the frequencies in this list
 are derived from homeopathic nosodes [vaccines], allergens,
 sarcodes [organ therapy preparations], or cell salts, some are
 directly from the specified ailment or substance. However, this
 distinction appears inconsequential since bio-energetic
 frequencies should be effective in either case.)

This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease. It must be first re-emphasized that RIFE frequencies generators available from AS are intended for use solely as dietary or nutritional supplements. The promotion of colloidal silver as a treatment for a specific medical condition is not possible because the extensive (and astronomically expensive) FDA approval processes for a new drug application have not been completed.

That being said, there are many references to supplemental doses that have been published. One such reference is found in an article entitled, "Using Colloidal Silver - Usage Philosophies". This article reiterates: "It should be noted that while colloidal silver use is quite widespread, there are no standardized formulas due to the fact that no conclusive research has been conducted that demonstrates an ideal (or effective) dose for any condition."

This article continues with several possible supplemental usage possibilities. The first is the "Mineral Supplement Ideology". "Many people believe that mineral depletion in the world's farming soils has seriously reduced the amount of natural minerals in the average diet necessary to maintain a state of good health. Those who use colloidal silver as a mineral supplement generally take about one tablespoon of colloidal silver daily (about 75 micrograms of silver.) Taking colloidal silver in these small amounts on a daily basis is generally felt to be an illness preventative with no associated risks." Note: One tablespoon equals 15ml, so 75mcg of silver intake would result if the solution was at a concentration of 5 ppm. A similar dose would result from the consumption of 1/2 a tablespoon of a 10 ppm solution. From the prior EPA guidelines we see that a balanced diet would normally yield 90mcg of silver, assuming the fresh foods were grown on non-depleted soils. A diet deficient in fresh fruits and vegetables would theoretically also be deficient in both silver and most other trace minerals.

The next dosage ideology discussed in this article is "Therapeutic Doses (internal). Many people use colloidal silver on a need only basis. Generally, one ounce is a common therapeutic dose taken at the onset of symptoms, taken daily until symptoms subside. Another preferred method is to consume multiple doses spread throughout the day. Those

who practice multiple doses usually take one ounce twice to four times daily, feeling that this produces a sustained and cumulative effect throughout the usage period. Once symptoms subside, users generally stop taking colloidal silver." Note: Once again the reference is to ounces of a 5 ppm solution. One ounce (30ml) at 5 ppm is equal to 1/2 ounce (15ml) at 10 ppm. In this example, one ounce at 5 ppm would equal 150mcg of silver, and four ounces would equal 600mcg, or 0.6mg. Even at the higher dosage, this consumption is still well below the EPA Critical Dose (the maximum daily approved consumption) of 1.09mg per day.

Similar supplement levels are found in an article "Colloidal Silver - The Rediscovery of a Super Antibiotic?" found at www.all-natural.com/silver. "One teaspoon of 5 ppm colloidal silver equals about 25 micrograms (mcg) of silver. 1-4 teaspoons per day (25 - 100mcg) is generally considered to be a 'nutritional amount' and is reported to be safe to use for extended periods of time. Amounts higher than this are generally considered 'therapeutic amounts' and should only be used periodically."

"In cases of illness, natural health practitioners have often recommended taking double or triple the 'nutritional amount' for 30 to 45 days, then dropping down to a smaller maintenance dose. Amounts from 1 - 32 ounces per day have reportedly been used in acute conditions."

This article continues with an important warning about the detoxifying effects of consuming a colloidal silver supplement: "If your body is extremely ill or toxic, do not be in a hurry to clear up everything at once. If pathogens are killed off too quickly, the body's five eliminatory channels (liver, kidneys, skin, lungs, and bowel) may be temporarily overloaded, causing flu-like conditions, headache, extreme fatigue, dizziness, nausea or aching muscles. Ease off on the colloidal silver to a smaller amount and increase your distilled water intake. Regular bowel movements are a must in order to relieve the discomforts of detoxification."
