Although she knew about the work of Royal Rife from a book that I had given her 7 years ago (The Cancer Cure That Worked by Barry Lynes), she said she had to go through the medical protocol that her oncologist prescribed in order to keep peace in the family. She did not want my ?out of the box thinking? to get me in trouble with my stepfather. Her husband is a firm believer in ?do what the DOCTORS say!?. So my mother started on chemotherapy in June of 2006, and she began the slow and painful decline to her death.</p> <p>As soon as my mother started on the first of four different chemotherapy protocols, I began researching how to buy a Rife machine. Until my mother?s diagnosis, I thought I had no reason to have a Rife machine. I got hold of you, Barry, by pure luck and a little help from Google, and your warmth and knowledge really helped me decide to purchase your company?s machine. Plus, I was able to call you free using the Skype phone, which continues to give me a great deal of peace of mind.</p> <p>On Sunday, October 8, 2006, my mother?s Doctor, via information from the home health care nurse, declared that the chemo was not working and he gave her two weeks to live. He told her by phone to quit taking the chemo and for us to consider Hospice care. My new Rife machine had arrived, and my mother said she was now able to try ?anything?. I explained to my step father what I wanted to do, and he was now so desperate that I had his blessing. My sister was with me as we gave my mother her first treatment. It was amazing to witness her improvement! She was awake and became very talkative! She wanted to get up and eat and was better than we had seen her in weeks. The next day her Doctor came to the house and he was so amazed at her improvement that he DOUBLED her chemo! He was convinced that her turn for the better was the result of the chemo! My sister and I almost died! We did not say anything for fear of the Doctor finding out that we were treating her with frequencies, and my stepfather once again bowed to the supremacy of the Doctor. My sister and I continued to treat my mother with the Rife machine for 5 days, and every time we used it there was a marked improvement in her condition for several hours. She continued to take her double dose of chemo via the home health care nurse every night, and every morning when my sister and I arrived, she was a little worse, but she ALWAYS improved after the afternoon Rife treatment. On the two days she was off the Rife machine (per Rife protocol) she got markedly worse from the chemo, and finally the Doctor took her off of the chemo for good, and she died the next day, which is when we would have begun the second round of the Rife machine treatments . She had slipped into a restless coma and I knew we had lost her. But the changes my sister and I witnessed in my mother using the Rife machine convinced both of us that if we had been allowed to start the treatments back in June she would be alive today.</p> <p>Thanks so much to you, Barry, and to Royal Rife for the wonderful moments we could have with my mother in her final days. I am looking forward to many health improvements for myself and my family thanks to your company and their dedication to selling only the best researched equipment at a reasonable price.</p> <p>Sincerely,</p> <p>Lynda Wilson</p> |
